

International Growth

DCL Engineering Group is proud to announce its new partnership with CIMM Group to begin selling CIMM Groups products in Europe and Australia.

DCL Engineering has welcomed a new partner, CIMM Group, to begin diversifying DCL's business model by acting as an agent within Australia and Europe. This unique opportunity gives DCL Engineering the opportunity to sell from CIMM group's wide product range; this includes but is not limited to: Raw material handling systems (RMHS), steel mill equipment, copper moulds and graphite electrodes.

Chairman Dr. Mark Ma of CIMM group and Greg Green Managing Director of DCL Engineering.

CIMM Group is an integrated technological;engineering, procurement and construction conglomerate based in China with global operations.

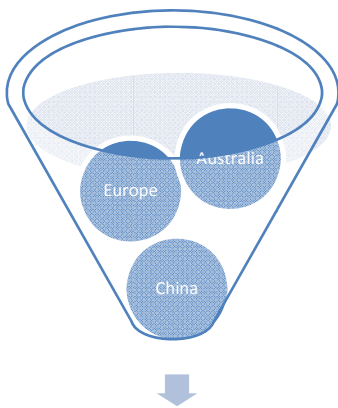

CIMM Group has over 60 years experience providing in-depth knowledge and experience coupled with international networks, this partnership provides an exciting opportunity to link these three great nations of China, Hungary and Australia, to enhance industry growth coupled with CIMM Groups corporate spirit and fundamental guidelines of QPR (Quality, Performance and reputation). DCL Engineering is very comfortable with fostering Guanxi to ensure a long-term relationship.

Raw Material Handling Systems

This exciting opportunity enables DCL Engineering 52 years of experience to sell an extensive variety of machinery to Australia and Europe offering: Port Machinery, Conveying equipment, Mining equipment (Underground and open pit) and beneficiation equipment. This enables DCL Engineering a broader scope of opportunities to sell into Australia's mining market.

Manufacturing and supplying for roll making

CIMM group is a global leader in roll making and quickly develops rolls in a variety of compositions to satisfy customer's needs. Forged & Tool steel rollers from CIMM are helping to advance the global steel industry and provide long term benefits, lowering production costs to Steel mill companies all over the world, ensuring that people's needs and aspirations are being met with their steel plate rolling mills.

CIMM group and DCL Engineering, integrating international experience and knowledge and applying them on a national level to enhance industry performance.
